Normally our acidity level drops over the summer, but this year there has been a lot going on.

- The Dominican Republic team is preparing for a mid-September trip provided all the various groups in the DR complete their work on time. The go/no go decision is coming up at the end of the month. The schedule is on our Google Drive for those interested.

- A grant proposal has been submitted to Rotary for renovation of the International House at Mattru hospital and provisions for training the staff at the hospital. Approval of the $50,000 grant seems likely and we should know more by early September.

- The SL team has been hard at work on designing the improvements for the International House that are needed for staff housing there. Trips to do the work are slated for January and February of next year. Again, details on the drive for those interested.

- Our paper “Project Execution in Sierra Leone - Cultural Aspects and Resource Limitations” has been accepted for the EWB conference in February. Now it just has to be written.
